

# Cabinets and Accessories

## Adjustable Shelves

Racky Rax adjustable shelves for wall mount and server cabinets are an alternative solution to fixed cabinet shelves. The vented design of the shelves are created to keep networking equipment cooler by increasing airflow throughout the cabinet.

Specially designed to fit in Racky Rax cabinets, the shelves come complete with four side fixtures, and extendible brackets. The fixed and adjustable feature makes these shelves extremely versatile in any installation.

The RR-S10 to RR-S12 are designed to fit wall mounted cabinets from 450 mm deep to 600 mm deep. Our RR-S20 - S22 range are designed to fit server cabinets and racks.
